

Understanding Profit Performance

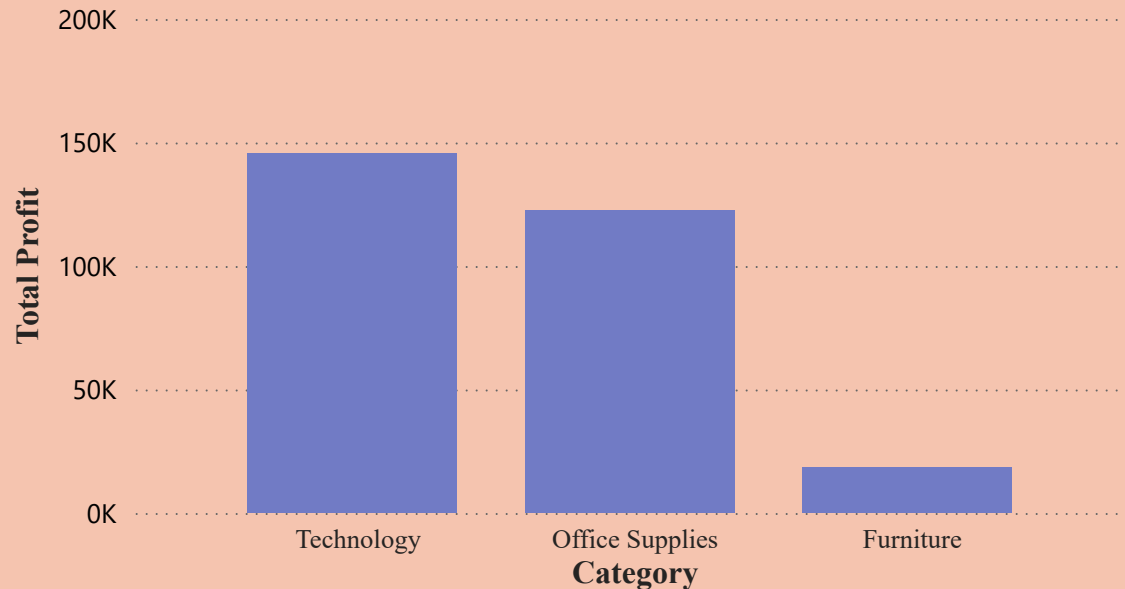

What factors are affecting profit performance?

\$2.30M
Total Sales

\$286.24K
Total Profit

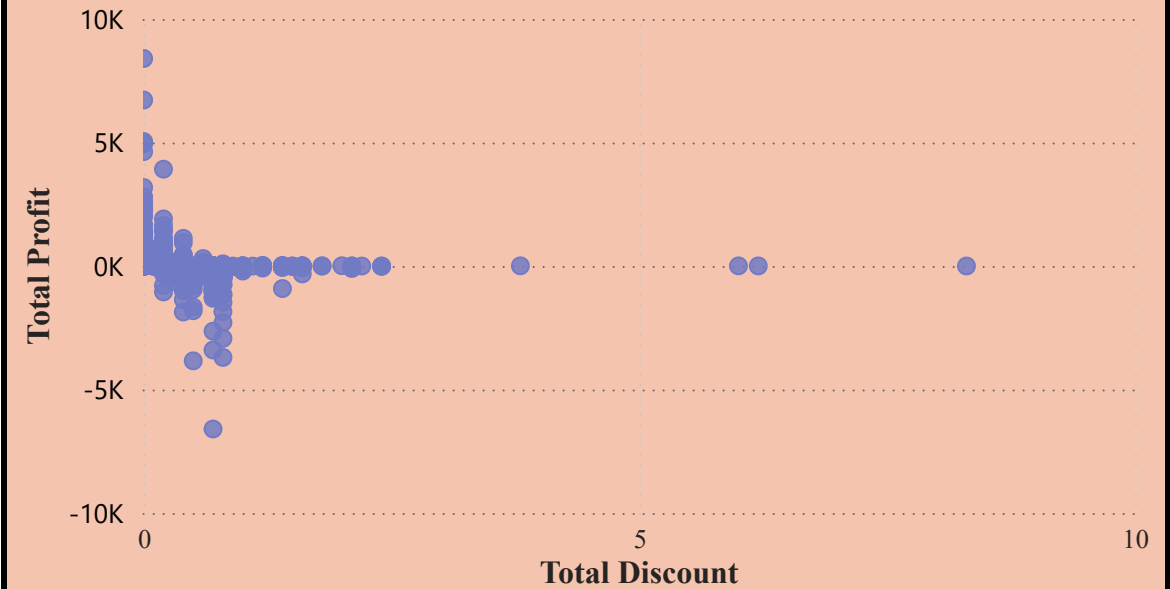

37.82K
Total Quantity

Total Profit by Category

Takeaway: Profit varies significantly by category, with Technology generating the highest total profit while Furniture contributes much less.

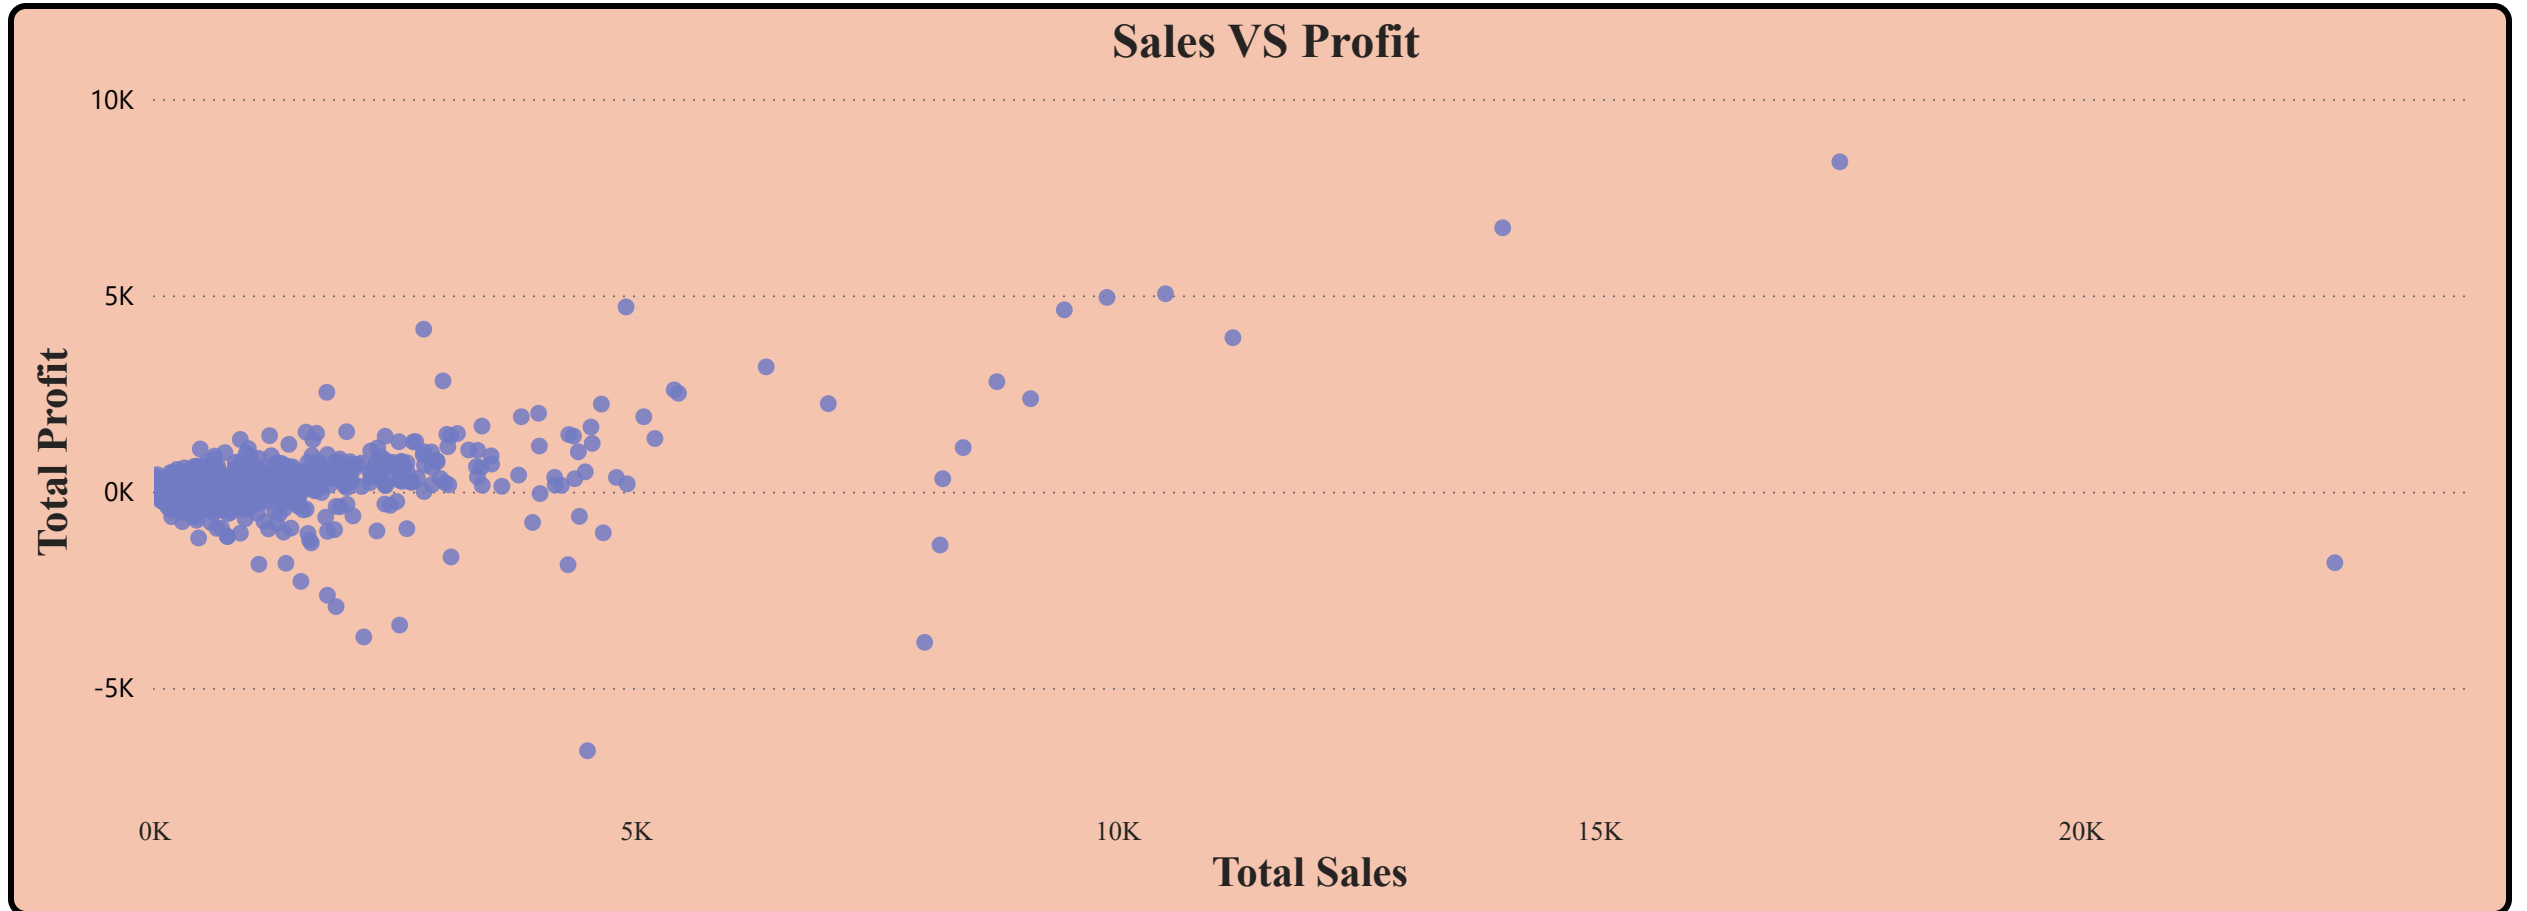

Discount VS Profit

Takeaway: Higher discounts are generally associated with lower profit, although the relationship is not strong.

Sales and Profit Relationship

Does higher sales always mean higher profit?

Takeaway: Sales and Profit have a moderate positive relationship, but higher sales do not always result in higher profit.

Discount and Profit

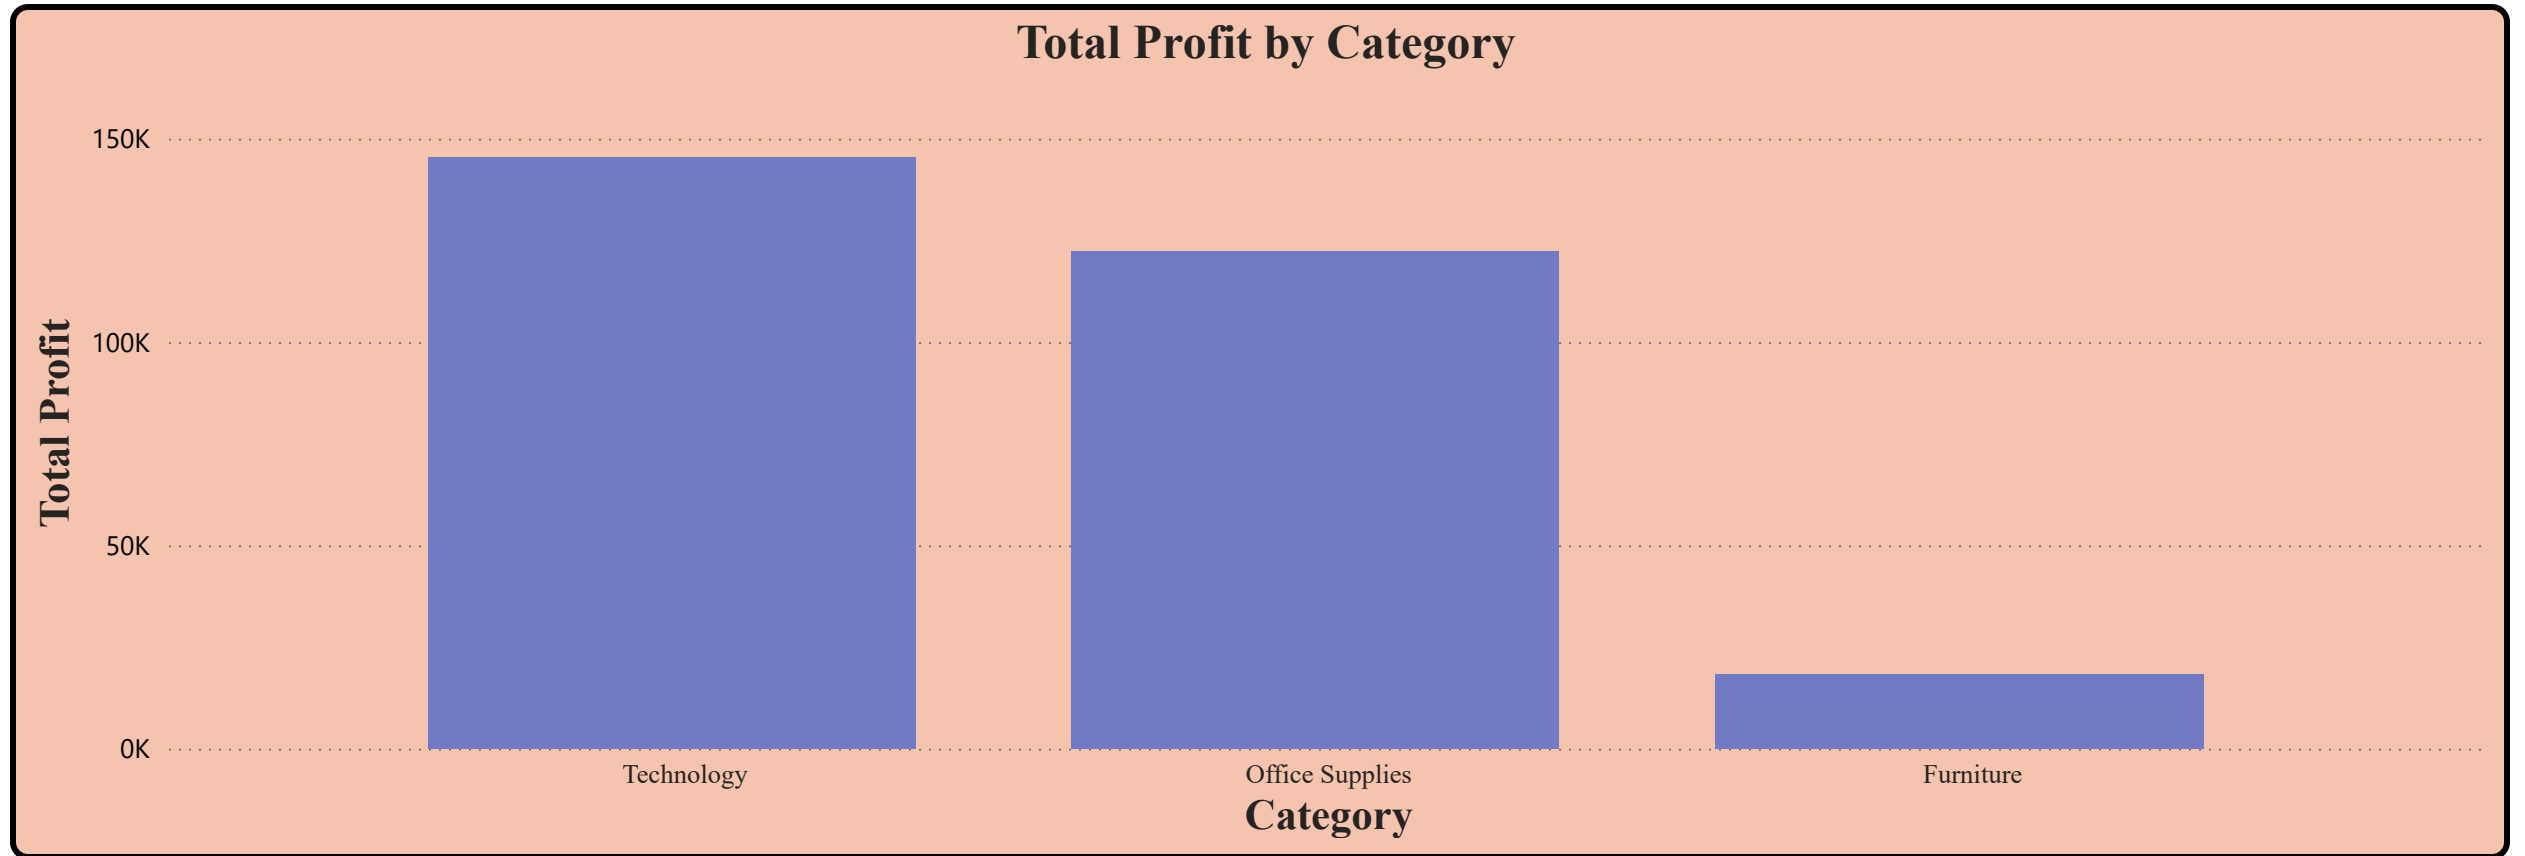

Does higher discount affect profit performance?

Takeaway: Higher discounts are generally associated with lower profit, although the relationship is not strong.

Category Profit Performance

Which product categories contribute most to profit?

Takeaway: Technology generates the highest total profit, while Furniture contributes much less despite having substantial sales.

Conclusion and Recommendation

What We Learned

Key Findings

1. **Technology is the strongest category :-** Technology generates the highest total profit among the three categories.
2. **Sales do not always mean higher profit :-** Sales and profit have a moderate positive relationship, but high-sales orders can still have low or negative profit.
3. **Discounts require attention :** - Higher discounts are generally associated with lower profit, although the relationship is not strong.

Recommendation

The business should focus on profitable sales rather than sales volume alone, while reviewing high-discount orders and lower-profit categories such as Furniture.
